About Data Privacy Services

Data Privacy Services is a dedicated consultancy covering a range of professional services relating to the European Union's General Data Protection Regulation (GDPR) and the security of personal data.

We provide certified data privacy professionals focused on the delivery of GDPR compliance along with its on-going assurance and management. These services include the provision of on-going data protection, including offering the key role of Data Protection Officer (DPO) 'as a service' to our clients. We also provide a range a security related services to ensure that our clients adhere to principle 6 of Article 5 of the regulation.

Data Privacy Services is a trading name of DMPC Ltd, a UK based limited company based in Surrey. We offer our services to a wide range of organisations across both the private and public sector. Our services are appropriate to all sizes of organisations, from very small businesses to large multi-national companies.

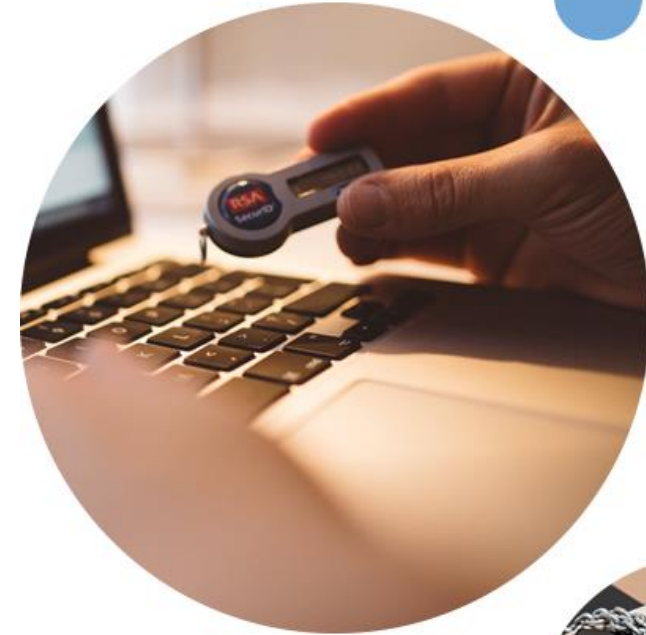

How safe is your data?

GDPR requires organisations to ensure that individuals personal data is kept safe. This is one of the key principles of GDPR compliance and should form a major part of your overall on-going compliance framework.

Personal identifiable information (PII) must be kept safe and all organisations must be able to demonstrate how this is being achieved. This includes all the data processing activities involving PII data undertaken by an organisation including manual and hard copy processing activities along with those done digitally.

Ideally an information security audit should be undertaken (at least annually) and the output of this audit used to improve data security and demonstrate adherence to the GDPR 'privacy by design' principle.

This approach provides a demonstrable means of complying with the data privacy regulation and can prevent data breaches and the obvious financial penalties involved under GDPR.

Two working days

On-site review

Objectives agreed up front

Informal report (via email)

[CONTACT US](#)

LEVEL #3

Four working days

On-site review

Objectives agreed up front

Formal Report

[CONTACT US](#)

MOST
POPULAR

LEVEL #4

Custom number of days

On-site review

Objectives agreed up front

Formal Report

[CONTACT US](#)

Our service levels are based around the amount of time you need to undertake the security assessment.

Levels 1 – 3 are fixed numbers of days we spend with you working through the requirements of your security assessment.

These objectives are always agreed up front.

Level 4 is where we customise this totally to meet your specific requirements

Typical Scope of the Assessment

PERSONAL DATA PROCESSING REVIEW

We undertake a review of all of your core processing activities to assess your personal data security.

GDPR requires you to have assessed the security of personal data for every processing activity that your organisation undertakes, including those of third parties. We will review your existing Data Privacy Impact Assessments (DPIA's) and make any appropriate recommendations to improve the security of the processing activity.

If you do not have DPIA's in place then we will work with you to develop these to the appropriate standard in order to highlight and recommend risk mitigations as required.

Typical Scope of the Assessment

OFFICE SECURITY REVIEW

We review your overall office security including all potential threats to your personal data security.

GDPR requires organisations to ensure the safety of all forms of processing of personal data. This includes all manual and other forms of processing that occurs in a typical office environment.

We undertake a full review of your Office security in relation to personal data security. This will include reviewing both IT and non IT processing activity. An important part of this includes the physical security of personal data and the review of other forms of processing such as voice recording, CCTV and the processing of others forms of personal data e.g. biometrics.

Typical Scope of the Assessment

CYBER THREAT ANALYSIS

We carry out a full cyber threat analysis of your IT systems to identify vulnerabilities to personal data security.

One of the most common ways an organisation can lose personal data is through a breach of their data security systems.

The risk of a cyber attack is now far more likely than it was previously. Data theft is a common problem with the perpetrators of this activity becoming ever more innovative in their approach to intruding into your personal data environment.

Our team of experts will undertake a full threat analysis review including penetration testing of your organisations network.

Typical Scope of the Assessment

POLICIES & PROCEDURES REVIEW

We assist you to develop the required policies and procedures needed to demonstrate data security compliance.

GDPR requires organisations to have a demonstrable approach to ensuring the security of personal data against theft and loss.

In order to do this, organisations require a full understanding of their requirements, approach and implementation plan for providing a secure environment for the processing of personal data.

We provide expertise to assist you to develop your data security policy, procedures and other key documentation such as a disaster recovery policy.

Our Security Resources

DATA SECURITY IMPLEMENTATION RESOURCES

Data Privacy Services can supply the necessary expertise your organisation needs to improve its personal data security.

We have years of experience in delivering data security improvements. Our team of security professionals are available to deliver whatever security improvements you are looking to implement.

Our team can assist you to gain security accreditations such as ISO 27001 or Cyber Essentials. Both of these accreditations are important in ensuring the safety of personal data and they crucially support your overall GDPR compliance in relation to Article 5 and the key principle related to the security of personal data.
